India | Open to Remote & Relocation

Summary

AI Engineer (B.Tech, AI & Data Science) with 1+ year of experience building LLM applications: RAG with hybrid retrieval, text-to-SQL, ReAct-style agents, LLM evaluation and secure FastAPI backends shipped with Docker. Also evaluates LLM outputs as an AI annotator.

Experience

AI Engineer, *Apana Time (Full-time), Remote* Jun 2025 – Present

- Built an AI/ML/Data Science tutoring chatbot on the Google Gemini API that gives structured, concept-level explanations; 50+ students queries are served.
- Added multimodal ingestion (images, CSV, PDF) with automated data cleaning and visualization, exposed through RESTful FastAPI endpoints for web applications.

AI Annotator, *DataAnnotation (Contract), Remote* Jun 2026 – Present

- Evaluate and rank LLM responses for correctness, reasoning quality and instruction-following against detailed rubrics, flagging hallucinations and unsafe outputs.
- Review and write code in AI-assisted programming tasks, identifying logic bugs and incorrect model-generated solutions.

Data Scientist Intern, *Oasis Infobyte, Remote* Jun 2024

- Delivered an end-to-end data science project in a 1-month sprint, producing a model and report that met the program's evaluation criteria.

Projects

DataAnalystBot – AI Data Analysis Platform | *FastAPI, Groq/Llama, LangChain, FAISS, PostgreSQL, Docker* GitHub

- Built RAG Q&A, natural-language-to-SQL and automated data augmentation with per-user FAISS stores and SSE streaming; SQL accuracy 98% on all test queries.
- Secured with per-user JWT auth (HttpOnly cookies) and slowapi rate limiting; Docker Compose (PostgreSQL, nginx) and a 26-test pytest suite.

Enterprise RAG Knowledge Assistant | *FastAPI, Groq, FAISS, BM25, PostgreSQL, Redis* GitHub

- Built hybrid retrieval (BM25 + FAISS) over PDF, DOCX, CSV and HTML uploads with source-cited answers, backed by SQLAlchemy, PostgreSQL, Redis and a Streamlit UI; faithfulness relevancy: 90%.

Autonomous Lead Agent – Multi-tenant AI SaaS | *Supabase, Postgres RLS, Groq, Gemini, Serper* GitHub

- Built live web-search lead generation with Groq/Gemini routing, Supabase Auth and row-level security for tenant isolation; added a credit paywall with atomic decrement, referrals and Resend inbound reply detection.

Olist SQL Agent – Agentic Text-to-SQL | *Python, LangGraph, DuckDB, RAG* GitHub

- Built an agent that turns business questions into validated SQL, executes it safely on DuckDB and answers from the results using retrieved business rules.

House Price Prediction – MLOps Pipeline | *scikit-learn, XGBoost, MLflow, FastAPI, Docker* GitHub

- Built an end-to-end pipeline on 20,640 rows; compared 6 models and selected XGBoost (R^2: 0.8369, RMSE: 0.4622), tracked in MLflow.

Technical Skills

Languages	Python, SQL, TypeScript
GenAI & LLMs	RAG (hybrid BM25 + vector), prompt engineering, LangChain, LangGraph, CrewAI, ReAct agents, Hugging Face, LoRA/QLoRA, Groq/Llama, Gemini
Vector DBs & Eval	FAISS, Pinecone, Ragas, DeepEval, LangSmith, Braintrust, LLM-as-a-Judge
Backend & Data	FastAPI, Flask, Django, SQLAlchemy, PostgreSQL, Redis, Supabase, REST APIs
ML & Vision	scikit-learn, XGBoost, PyTorch, TensorFlow, OpenCV, MediaPipe
Cloud & MLOps	AWS, Docker, Docker Compose, MLflow, Git, pytest

Education

Chhattisgarh Swami Vivekanand Technical University, Bhilai Graduated 2026
B.Tech, Artificial Intelligence & Data Science (CGPA: 8.1/10) Chhattisgarh, India

Certifications & Achievements

- AWS Cloud Practitioner and AWS Solutions Architect – Associate (GeeksforGeeks course certificates, Jun 2026)
- Participant, AlgoVision Data Analytics Case Competition, KOED × IIT Roorkee (COMET'25)
- HackerRank Python Certificate (2024); Udemy Python for Data Science & Machine Learning Bootcamp (2023)
